

The JAVA[®] Decaf Back: pediatric-sized, fully-adjustable back support

**Couple the Decaf Back
with your Ride Cushion
of choice, for benefits
not found in planar or
other seating systems:**

- Precision support
- Adjustability
- Growth accommodation
- Breathability
- Incontinence protection
- Lightweight
- Adaptability
- Safety

Unprecedented flexibility
for precision fit.

Contour adjustability
through stays and pelvic wedges.

Accessorize
with headrest and/or lateral supports.

Back height

Rotation

Seat depth

Back angle

Fit any Decaf Back
to any wheelchair 10-14" in width.

Keep up with the growing and developing child
by replacing only the back shell and insert.

Safety tested
The Decaf Back has undergone dynamic testing for use in a motor vehicle (RESNA WC-F:2012, Section 20; ISO 16840-4) and, along with the FlexLoc®2 attachment hardware, meets all applicable criteria for wheelchair back supports.

Lightweight mounting
Quick release hardware for easy one hand removal. Easily convert to fixed mount in the field.

Available in a range of heights and widths
All options and specifications are available on the Ride website.

▶ NOTE: For more complex postural issues, please consider the **Ride Custom Back**.
